YOU'RE IN

HERE'S WHAT HAPPENS NOW.

Three things today. The first one is the only one that can hold everything up, because your system gets built by hand from your intake before we ever get on a call. Every link is printed here so you never lose them.

01

FILL OUT YOUR INTAKE. TODAY.

This is what the whole build runs on: your numbers, your training, and the food you actually eat. **Nothing starts until it is in**, so do it before anything else.

START MY INTAKE

02

BOOK YOUR ONBOARDING CALL

Book it two to four days out. Your system will already be built and waiting when we sit down, so the call is a walkthrough, not a kickoff.

BOOK MY CALL

03

JOIN THE PROJECT

Free, and it is where the teaching lives between calls. If you are already in there, skip this one.

JOIN THE ROOM

Why the call is a few days out

Your system is built by hand off your intake, not generated off a template. That takes a couple of days, and it is the reason the plan fits your week instead of a general one. Your $200 deposit holds the build slot and ships your kit. The $797 balance completes on that call, and your system, your files and your app access are released to you there.

WHAT HAPPENS FROM HERE

TODAY
Intake in, call booked, and you are in the room. Your kit ships.

2 TO 4 DAYS
Your onboarding call. We go through your system, the balance completes, everything is released.

5 TO 7 BUSINESS DAYS
Your kit lands. Swab it and mail it back the same day.

2 TO 4 WEEKS LATER
Your genetic read is done. We sit down and put it into your system.
