YOU'RE IN

HERE'S WHAT HAPPENS NOW.

Five things. The first two take ten minutes, and your app opens as soon as your intake is in. The intake is the one that can hold everything up, because your system gets built by hand off what you tell me, not off a template. Every link is printed here so you never lose them.

01 FILL OUT YOUR INTAKE. TODAY.

This is what the whole build runs on: your numbers, your training, and a three-day recall of the food you actually eat. **Nothing starts until it is in**, so do it before anything else.

START MY INTAKE

02 SET UP YOUR APP

Your access opens the moment your intake is in. Sign in with **the same name, birthday and email you just gave me**, then add it to your home screen so it opens like an app.

OPEN MY APP

03 BOOK YOUR FIRST CALL

Your three calls run the week of November 2nd. Book the first one now so you get the slot you want. That is the Assess call, and we go through your system line by line.

BOOK MY CALL

04 THEN YOU RUN IT AND TRACK

Your system lands in 48 to 72 hours, built by hand off your intake. From there you run it and track your week. **That week is what your first call reads.**

WEEK ONE

05 JOIN THE PROJECT

Free, and it is where the teaching lives between calls. If you are already in there, skip this one.

JOIN THE ROOM

Why your calls start in November

Your system is built by hand off your intake, and it is in your hands within 48 to 72 hours. Jayme is away October 23rd to the 31st, and that is the tracking week, which is exactly where it belongs: you eat how you already eat, and the build runs off what is real. You paid in full, so nothing is outstanding and nothing renews. Your app opens as soon as your intake is in, and your system lands within 48 to 72 hours.
