YOU'RE IN

HERE'S WHAT HAPPENS NOW.

Four things. The first two are today. The intake is the one that can hold everything up, because your system gets built by hand off what you tell me, not off a template. Every link is printed here so you never lose them.

01 FILL OUT YOUR INTAKE. TODAY.

This is what the whole build runs on: your numbers, your training, and the food you actually eat. **Nothing starts until it is in**, so do it before anything else.

START MY INTAKE

02 BOOK YOUR FIRST CALL

Your three calls run the week of November 2nd. Book the first one now so you get the slot you want. That is the Assess call, and we go through your system line by line.

BOOK MY CALL

03 TRACK THREE HONEST DAYS

Eat exactly how you already eat and log three days. Do not clean it up and do not perform for the data. **Those three days are what I build your go-to meals from.**

THIS WEEK

04 JOIN THE PROJECT

Free, and it is where the teaching lives between calls. If you are already in there, skip this one.

JOIN THE ROOM

Why your calls start in November

Your system is built by hand off your intake and your three tracked days. Jayme is away October 23rd to the 31st, and that is the tracking week, which is exactly where it belongs: you eat how you already eat, and the build runs off what is real. You paid in full, so nothing is outstanding and nothing renews. Your system, your files and your app access are released on your first call.

WHAT HAPPENS FROM HERE

TODAY
Intake in, first call booked, and you are in the room.

THIS WEEK
Your kit ships. You log three honest days, eating exactly how you already eat.

5 TO 7 BUSINESS DAYS
Your kit lands. Swab it and mail it back the same day.

WEEK OF NOVEMBER 2
Your three calls. Assess, Adapt, Assign. Everything is released on the first one.
